

.title
the formatting commands

.synonym
formatting commands

.description
The commands used to specify how the media components like text and pictures should be presented.

.contents

Without any formatting commands, the text and pictures will be glued together. Multiple white spaces are reduced to a single blank. .nl .nl

1- text formatting commands:

.nl
.nl
.quote-line .para or .PARA
.nl Paragraph: equivalent to two newlines and indentation of xxx characters for the first line of the paragraph

.nl
.nl
.quote-line .nl
.nl Newline

.nl
.nl
.quote-line .quote <a word>
.nl The word argument is taken literally, ignoring command or other special characters in it. For example to show the command .quote .nl, the author has to write .quote-line .quote .nl

.nl
.nl
.quote-line .quote-line <a line>
.nl Same as quote, but takes the whole line as its argument.

.nl
.nl
.quote-line .spaces <number of spaces>
.nl Insert N spaces

.nl
.nl
.quote .rem
.nl Remark. The rest of the line is ignored. Used to put comments in a storyboard

.nl
.nl
PROJECTS:
.nl
- a blank line in the storyboard will be equivalent to a newline
.nl
- .quote .table-on/off will be used to turn-off or turn on the formatting.

When the formatting is turned off, the text is displayed exactly as typed.
